

SAFETY ACHIEVEMENT

1 YEAR ACCIDENT FREE COAST TO COAST

It is with great pride and honour that the management team of Machines Roger International would like to congratulate all employees for their outstanding performance in health and safety by completing a complete year without a lost time accident.

Earlier this year, Machines Roger was awarded the Atlas Copco trophy to recognise the lowest accident frequency, and the Orica Award for the best improvement in the accident prevention in the workplace by the Quebec Association of Mining Contractors (AEMQ). In addition, at its last annual general meeting, the Mining Association of Quebec (AMQ) honoured Roger Machines International by awarding the company the prestigious F.J. O'Connell trophy, recognising excellence in prevention of accidents in the underground operations category, less than 400 000 hours.

These results are a result of the work accomplished by all throughout our operations located in Quebec, Ontario, New Brunswick, British Columbia and in the North West Territories. This makes the receipt of these awards even more special and glorifying.

Again, thank you and congratulations to the entire Machines Roger International team!

The Management
